This booklet lists U.S. scholars receiving 1980-81 awards for university lecturing and advanced research abroad under the Mutual Educational and Cultural Exchange Act (Fulbright Program). A few awards are pending and will be included in a supplemental announcement to be published in December.

In October CIES publishes a similar list of senior scholars from abroad visiting the United States under Fulbright auspices. Those interested may request copies.

The purpose of the Fulbright Program is "to increase mutual understanding between the people of the United States and the people of other countries." The International Communication Agency contracts with CIES to conduct annual competitions for senior awards. CIES arranges for the professional review of applications and nominates candidates for consideration by institutions abroad and by the Board of Foreign Scholarships.

American scholars and other professionals interested in university lecturing and advanced research abroad are invited to register with CIES. In March or April registrants receive the announcement of awards to begin 12-18 months later. The general competition for Australia, New Zealand and Latin American countries closes June 1, and for countries in Africa, Asia and Europe, July 1. Late applications may be accepted to meet specific country requests.
