Introduction

American Fulbright Scholars, 1998-99

Each year over 700 Americans are awarded Fulbright grants to lecture or conduct research abroad. Grants range in duration from the full academic year of the host institution or country to a semester or less.

About 75 percent of the awards are for university lecturing, usually in a field of importance to the host institution. Many lecturing awards allow opportunity for research, and research scholars may undertake occasional lecturing. Terms of awards vary from country to country, but generally include round-trip travel, basic health insurance, and maintenance allowances.

Most awards require the doctorate and appropriate professional experience. While English is acceptable for many assignments, fluency in a language is sometimes required. All applicants must be U.S. citizens.

The Directory

The directory lists nearly 700 American scholars who recently received Fulbright awards for university lecturing and advanced research abroad. They will hold various appointments in some 120 countries during the 1998-99 academic year. The dates that appear at the end of the entries indicate when each scholar will be abroad. A few of the dates may change, however, since specific information was unavailable when the directory was printed.

The descriptive information for each scholar is arranged according to academic discipline. Scholars are also listed alphabetically, by home state, and by host geographic area in the indexes.

The directory lists scholars whose grants were confirmed as of September 15, 1998. Additional grants may be issued after this date, and scholars receiving those grants will be listed in a separate section of the 1999-2000 edition of the directory.

Following the Special Programs Index is a list of 1997-98 scholars whose grants were confirmed after October 1, 1997, and whose names did not appear in last year's directory.

Participants in the following short-term seminar programs are listed immediately after the discipline section:

- Fulbright German Studies Seminar
- U.S.-Germany International Education Administrators Program
- U.S.-Japan International Education Administrators Program
- U.S.-Korea International Education Administrators Program

The National Competition

American scholars and other professionals interested in university lecturing and advanced research abroad should request information and application forms from CIES. An announcement of Fulbright scholar awards to begin 12-18 months later is published in March.

Administration and Funding of the Fulbright Program

The Fulbright Program is authorized by Public Law 87-256, the Mutual Educational and Cultural Exchange Act of 1961, as amended. The purpose of the program is "to enable the government of the United States to increase mutual understanding between the people of the United States and the people of other countries . . . and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries of the world." The primary source of funding is an annual appropriation made by the Congress to the United States Information Agency (USIA). Participating governments and host institutions in many countries and in the United States also contribute financially through cost-sharing, as well as by indirect support such as salary supplements, tuition waivers, university housing, and other benefits.

Grants are made to U.S. citizens and nationals of other countries for a variety of educational activities, primarily university teaching, advanced research, graduate study, and teaching in elementary and secondary schools. Grants for foreign nationals are available through the binational Fulbright commission/foundation or U.S. embassy in the country of citizenship. The Fulbright Scholar-in-Residence Program also provides opportunities for U.S. host institutions to sponsor visiting lecturers.

The J. William Fulbright Foreign Scholarship Board, composed of 12 educational and public leaders appointed by the President of the United States, has statutory responsibility under the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act), as amended, for the selection of all Fulbright grantees and the supervision of the Fulbright Program worldwide, including the formulation of policy guidelines governing such exchanges.

The United States Information Agency (USIA) develops policies to assure fulfillment of the purposes of the program and administers the program with the assistance of binational educational commissions and foundations in some 50 countries that have executive agreements with the United States for continuing exchange programs, United States embassies in approximately 90 other countries, and a number of cooperating agencies in the United States.

The binational Fulbright commissions and foundations establish the numbers and categories of grants, based on the annual commission/foundation program proposal and on their consultations with local universities; review applications of nominated Americans and arrange or confirm their academic affiliations; and provide orientations and facilitative services. In a country without a commission or foundation, the U.S. embassy develops the program and supervises it locally.

The Council for International Exchange of Scholars (CIES), affiliated with the Institute of International Education, is a private organization that facilitates international exchange in higher education. Under a cooperative agreement with USIA, CIES assists in the administration of the Fulbright Scholar Program.
